PROJECTS

UTTR (Up To The Right) | github.com/Kinla/UTTR | uttr.herokuapp.com

- UTTR is a community that brings together individuals seeking self-improvement. We allow our users to create commitment contracts that helps them achieve their goals
- Responsible for core functionality of the application – outputting the goals into user dashboard, storing goals, calculating the UTTR points basing on success to fail rates

Tools/Languages: Material Design for Bootstrap 4, Node.js, Express, Handlebars, MySQL, Sequelize, Firebase, Passport

Read Lounge | github.com/pphan93/read-lounge | <https://readlounge.herokuapp.com/>

- New React-based Google Books Search App. Display books based on user searches using Node, Express, MongoDB, and Google Books API
- Created the whole project independently under a week

Tools/ Languages: React, JSX, JavaScript, React MDBootstrap package, Node, Express, MongoDB

illHUEminate | github.com/LuckyP86H/illHUEminate | luckyP86h.github.io/illHUEminate/

- Control HUE light bulb using a palette of colours from an image
- Responsible for getting JSON from API calls, and storing images to Firebase Storage

Tools/ Languages: JavaScript, JQuery, AJAX, API, Bootstrap, Philip Hue Light/Hub, Router

EXPERIENCE

2014 – Present

Equitable Bank

Toronto, Canada

Application Analyst

2018- Present

- Collaborate with project team members during requirements, design, implementation, verification and maintenance phases of the Microsoft CRM Dynamic, Sitefinity Migration from Datacenter to Azure, and migration SharePoint 2010 to SharePoint 365
- Lead the Marketing and Digital Banking Departments in deploying and configuring a new website/server on Azure, and supported the web developer on troubleshooting related problems with MSSQL, IIS, and Sitefinity
- Ensure the integrity of databases, data dictionaries, files associated with the regulatory reporting application
- Guarantee the applications are running 99% of the time, and created run books for each of the applications

Financial Analyst

2016 – 2018

- Oversaw the evaluation of data quality by monitoring, auditing, and resolving inconsistencies in data warehouse and applications
- Analyzed key performance metrics with the ability to engineer and produce over 40 financial reports including sub-ledger/general ledger reconciliation, daily statistics of funded loans, and beacon credit quality using IBM Cognos TM1, Excel, SQL, and VBA
- Reduced errors and expedite processes by 12 hours per month by creating VBA programs to automate repeatable tasks

IT Administrator

2014 – 2016

- Resolved, maintained, and diagnosed over ~550 employee's issues relating to PC's, laptops, printers, file servers, DHCP, AD, NFS, GPO, and networking switches, routers, and firewalls
- Deployed, configured, and maintained of ~10 servers with Windows 2008/2012 and Linux, as well as collaborated with a web developer on debugging and troubleshooting problems
- Supervised and evaluated the security for each computer by reviewing and updating anti-virus and firewall protection, VPN configuration, control resources, log files, and access requests
- Increased productivity and automated repetitive tasks by designing, writing, and supporting bash, PowerShell, VBScript, and Automate

2014 - 2014

Home Trust

Toronto, Canada

PC Life Cycle Technician

- Provided first tier support for departmental hardware and software issues for ~700 end-users as well as led a departmental upgrade of 200 systems in 3 months from Windows XP to Windows 7

EDUCATION & CERTIFICATION

Bootcamp Certificate: University of Toronto

Toronto, Canada

A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handlebars.js & ReactJS.

Seneca College

Toronto, Canada

Computer Networking & Technical Support Diploma (2014)
